

## JStengel Consulting Announces WatchGuard XCS Training Classes

May 14, 2010

Today we are pleased to announce the launch of our WatchGuard XCS training classes. The WatchGuard XCS line of products provides email security through SPAM filtering, encryption and DLP. Using the XCS device correctly adds considerable amounts of security to a network and a business.

We will train our students on the setup, installation, management, and asset protection features. This intense 3 day class will be held in our Charlotte training facility to start with and we will expand to other markets early next year.

Contact us at 704-464-4468 or [info@jstengel.net](mailto:info@jstengel.net) for details.
