JStengel Consulting Announces New Watchguard Class

JStengel Consulting announces new Watchguard training class. Building on the terrific Watchguard Firewall and UTM platform, JSC is now training on using your Watchguard appliance in preparing for and recovering from a disaster. The new Watchguard Disaster Recovery/Business Continuity/Advanced Failover course is geared towards how you can use your UTM/XTM appliance to quickly recover from a disaster and streamline business processes in preparation for a disaster.

Students who have completed the Watchguard In-Depth course will learn:

- Disaster Recovery Scenarios with Fireware and Fireware Pro
- Incorporating Watchguard into your Business Continuity Plan
- Advanced Failover Techniques
- Preparing for Network Connectivity Before an Outage
- Testing a Disaster Scenario with your Firebox
- Recovering from a Crashed Firebox Quickly
- High Availability

JStengel Consulting is the first certified training provider to train students on pushing their Watchguard to its full potential in disaster scenarios. JStengel Consulting has always been a leader in disaster and recovery. Now utilizing this fantastic security platform companies can go even further. Please review our website and contact us with any questions. Our site also contains course times and locations.
